BATTERY PRO

Detector/Cleaner/Neutralizer/Protector

BATTERY PRO is a one step solution to battery terminal corrosion removal and acid neutralization. BATTERY PRO delivers a powerful, heavy duty foam that clings to battery surfaces, provides extended contact time and neutralizes acid quickly. BATTERY PRO helps eliminate amperage drains and acids in restoring full starting power. BATTERY PRO features a low odor, non-flammable, water soluble formula. Battery Pro leaves behind a residual film that provides short term corrosion resistance. BATTERY PRO contains a unique color indicator that changes from yellow to red as battery acid is neutralized.

DIRECTIONS:
SHAKE WELL BEFORE USING. Spray on cables, clamps, terminals, brackets, housings, and entire battery surface. (be sure call covers are tightly sealed). Product will spray out a light yellow and turn red in the presence of acid. Allow foam to work for several minutes, then flush off with water. Follow with a second application. If solution still turns red, acid neutralizing process id not complete, repeat procedure until acid is completely neutralized. For heavy deposits, agitation with a wire brush may be needed. If foam spray remains yellow, all acid has been neutralized. Allow product to dry and form a residual protective film.
