GLIDE 

**Blade Coating**

GLIDE is a special blend of silicone that provides a slick, non-stick coating that prevents ice and snow from sticking to plows, shovels and other snow removal equipment. Treated surfaces also become water and rust resistant. GLIDE is fantastic for mowers, spray on blades and under decks to keep grass from sticking to blades and undercarriage. GLIDE reduces drag and increases mowers work efficiency. Coating provides superior release action and lubrication to reduce drag and sticking of many materials to metal and other surfaces. GLIDE is excellent for use on road signs to keep snow and ice from sticking and allows for easy readability.
