LUBRICATOR III
Penetrating Lubricant

LUBRICATOR III is a fast acting, high oil content aerosol that penetrates, displaces moisture and lubricates by utilizing both Teflon and molybdenum disulfide. LUBRICATOR III has excellent penetration power for loosening frozen and rust corroded parts, removes moisture, loosens and lubricates. LUBRICATOR III quickly displaces moisture from ignition systems and protects against corrosion on unpainted surfaces. Low in toxicity and harmless to most rubber and plastics and is heat resistant up to 500°F.
