TOTAL KNOCK OUT — TKO

TOTA LLY Knocks Out Odors

TKO is a "TRUE DEODORANT", which means it eliminates odors and that it does not just cover them up with a nice fragrance. TKO contains a chemical molecule that is concave in shape and blends perfectly with all foul-odor molecules. Once TKO molecules trap the offensive molecules, the newly formed molecule has a different structure and is no longer an offensive odor. Only foul odors are affected by this change, leaving fresh, pleasant fragrances untouched. TKO is effective on many different kinds of odors, but it works best on cigarette and cigar odors. TKO leaves a pleasing floral scent.

DIRECTIONS:
For best results, first close the area to be treated, making sure all people and pets have cleared. In kitchens, all food, dishes and food utensils should be put away or covered. Using a trigger sprayer, spray a fine mist in the air, avoiding paint or wall paper. Spray carpeting and air vents, but not to the point of runoff or overly damp carpeting. Several light applications are more effective than one heavy application.
