TURF KING
WATER BASED NON-SELECTIVE WEED KILLER

TURF KING is a non-selective, total kill herbicide designed for use where control of all vegetation is desired. Since most of the activity is done through the roots, it is emulsifiable and requires adequate rainfall to move the herbicide into the root zone. TURF KING is only recommended for non-cropland areas away from residential/recreational areas, outside of the drip line of trees and away from the roots of desired plants, brush, foliage and trees.

FOR USE BY:
Airports
Apartment Buildings
Buildings Maint.
Grounds Maint.
Bus Lines
Corrections
Daycares
Hospitals
Hotels/Motels
Medical Buildings
Military
Nursing Homes
Packaging Plants
Parks and Rec.
Processing plants
Restaurants
Sanitation Department
Schools
Street Departments
WWTP

FOR USE ON:
Along Pipelines
Around Buildings, Industrial Sites
Railroad Rights-of-Ways
Loading Ramps
Parking Lots
Fence Rows
Storage Yards
Tank Farms

FEATURE-BENEFIT:
Quickly and effectively eliminates all vegetation.
Under normal conditions, a single application stops weeds from coming back for one growing season.
Ideal for use on non-cropland area.
The degree of control and duration depends on the amount of herbicide applied, soil type rainfall and other conditions.

DIRECTIONS:
Typical Application: Mix 1 gallon with 10 gallons of water and apply over 1000 sq ft. Thoroughly wet foliage to insure contact. For best results, apply during or after weed emergence while growth is succulent. Where vegetation is tall and dense, use 1 gallon with 10 gallons of water per 1000 sq ft.

Hard to control weeds: For hard to control perennials and grasses, use 3-4 gallons mixed with 10 gallons water per 1000 sq ft.

TECHNICAL DATA:
Appearance: Reddish-brown Liquid
Fragrance: Fuel Oil
Concentrate: Yes
Flash Point: 123 °F

Quantities: 55, 30, 6, 5, 4 Gallons
